

MANIFESTO

We're involved and you can call us the Viable Community.

We believe in a power beyond ourselves.

Within and without.. we call ourselves the Viable Community.

We are doing what we cannot "not do" and we are the Viable Community.

We help nature, we build organizations, we help people,

we support, create, and teach the world for good.

Yes... I am part of the Viable Community and this is our manifesto.

- 
- 
- 
1. Human living is about experience.
 2. Nature is the foundation for human experience and needs to be guarded, conserved, maintained and regenerated.
 3. We believe in consciousness and interconnectivity of all life.
 4. We believe in successful communication, science, technology and diversity.
 5. We believe in the power of community. We are all in this together and we will create our future together with a sense of unity.
 6. All people want to learn and grow. Therefore everyone should have access to all information and basic life support.
 7. People feel the need to be engaged in the processes that support their existence, therefore, everyone should be able to feel like they belong.
 8. We believe in our inner compasses. Everyone is unique and has a personal way of experiencing which results in everyone's personal quest.
 9. We love to work at the right time, pace and place. We make space for a feeling of calmth, timelessness and sustainability.
 10. We work from a base of trust, simplicity, honesty, respect and responsibility.

In order to move forward into a healthy future for human experience we need to:

- * Protect nature and wildlife (focus on most valuable pieces and most pure places of this planet).
- * Facilitate fulfilling human lives which will result in a vitalising interaction.
- * Do everything we do from our own personal center with harmony between what we feel inside and what is provided by our own personal surrounding worlds.

This requires:

- * The creation of a (sense of) community.
- * Freedom from non sustainable institutes/organs.
- * Harmonious Cohesion.
- * Co-creation, co-owning and shared responsibility.
